Global Economic & Financial Crisis

Essays from *Economic and Political Weekly*

In this volume economists and policymakers from across the world address a number of aspects of the global economic crisis. One set of articles discusses the structural causes of the financial crisis. A second focuses on banking and offers solutions for the future. A third examines the role of the US dollar in the unfolding of the crisis. A fourth area of study is the impact on global income distribution. A fifth set of essays takes a long-term view of policy choices confronting the governments of the world.

A separate section assesses the downturn in India, the state of the domestic financial sector, the impact on the informal economy and the reforms necessary to prevent another crisis.

This is a collection of essays on a number of aspects of the global economic and financial crisis that were first published in the *Economic & Political Weekly* in early 2009.
